22.1 Jaggaer Release
New Features Impacting End Users

General Site Enhancement ([Click here for release notes](#))
[Online Help Redesign and Enhancements](#)   - Navigate to solutions easily by selecting a 'tile' from the Home Page.   - Find feature information in a collection of 'articles' with easy navigation to important points and related articles.   - Easily navigate to other articles, solutions and back to the home page.

eProcurement ([Click here for release notes](#))
Currently, the What's Next? panel is displayed in the collapsed view by default. Users have indicated that they would like the panel to be expanded by default. Beginning after the 22.1 release, Jaggaer will start setting the What's Next? panel workflow to display in the expanded view by default for Users. Jaggaer is taking a gradual approach, and will make the change for small groups of customers at a time while they monitor system performance.

Supplier Management ([Click here for release notes](#))
- Supplier Profile - Globalization   - The "JAGGAER Supplier ID" on the supplier profile is now labeled JAGGAER Indirect Supplier ID.

Sourcing ([Click here for release notes](#))
N/A

Contracts+ ([Click here for release notes](#))
- Contracts+: Improved Attachment Management - New Feature which allows attachments to be separated by General and Internal. General Attachments should include the main contract document and any attachments/exhibits that should be sent to the supplier. Internal attachments should be used for items such as the CCRC, email correspondence copies, SAM.gov searches, etc..   - Enhanced DocuSign Integration - New feature that allows eSignature enabled contracts to be resent to the signers directly from MMP. This requires that the chair/designee signatory is added to the eSignature section in MMP by the CP Contracts Compliance Team at the time of compliance review.
