

**Program #401990 - ARP - Health Data Exchange**

7/14/2022

**Department:** Health Department      **Program Contact:** Aaron Monnig  
**Program Offer Type:** Existing Operating Program      **Program Offer Stage:** As Adopted  
**Related Programs:** 40005  
**Program Characteristics:** One-Time-Only Request

**Executive Summary**

Provide a Health Data Exchange platform to push Emergency Medical Services data to the hospital electronic charting systems, and to push data and information from the hospital electronic charting systems back to the emergency medical service charting systems.

**Program Summary**

The purpose of this program is to provide a platform the pushes data from the emergency medical services electronic charting systems to the hospitals electronic charting systems and also sends hospital outcome data back tot the emergency medical services electronic charting systems. This has great benefits for the hospitals, emergency medical services agencies, and the emergency response system. This will give near real time feedback, and ability to provide a more robust quality improvement to assist in getting the right resources to the right patients the right way. The biggest benefits include near real time communicable disease exposure notifications- when a hospital determines a person has a communicable disease the provider could be notified without additional resources making the notifications. This program offer will connect multiple electronic patient care reporting systems together- the County does not own or operate any of these systems. The County EMS Program, and Medical Directors use these systems to perform quality assurance and quality improvement activities.

**Performance Measures**

Measure Type	Primary Measure	FY21 Actual	FY22 Budgeted	FY22 Estimate	FY23 Offer
Output	a system that improves quality assurance and quality improvement activities for the EMS system	N/A	N/A	N/A	N/A
Outcome	establish a contract with a vendor capable of providing a health data exchange	N/A	N/A	N/A	N/A

**Performance Measures Descriptions**
