Testimony:

I am a nature lover, hiker, parent, and biker. Please please include access for mountain biking in your plan. I am also a part of NWTA and we respect and take care of our nature areas we recreate in.

- Please provide a variety of opportunities for people to experience nature in different ways, hiking, biking, sitting. These can be shared sustainable trails, easily. Trails get me outside and help me teach my son about the importance of nature and how to respect and take care of it.

-With careful planning, it's possible to create opportunities for people to enjoy nature while also protecting it. Well-designed and constructed trails will limit habitat impacts by minimizing erosion and stream crossings, by providing corridors for wildlife to move, and by leaving the canopy intact.
