

Natural Hazard Mitigation Plan Renewal Project 2011

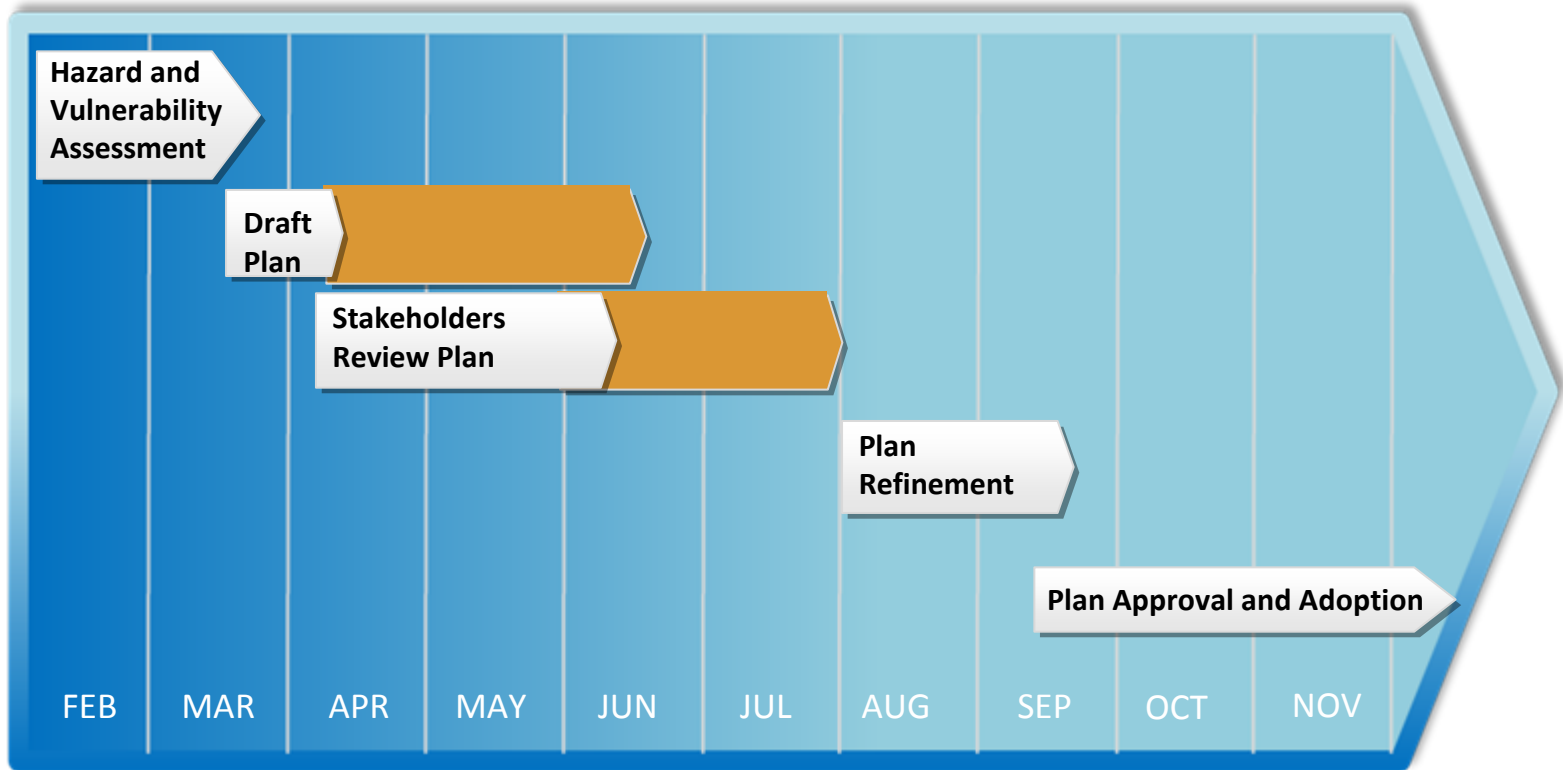

This month we have begun to gather historical data regarding local natural hazard impacts. Data is coming from many sources including you the public.

Natural Hazard Mitigation Plan Renewal Project 2011

Chapter 1, an intro to the plan, has been reviewed by members of the Steering Committee. Work has begun on Chapter 2 which focuses on a profile of Multnomah County. To capture our community's profile, we are collecting information from a variety of sources including a variety of stakeholders, local demographic information, and the 2010 Census. Stakeholders have been organized into three groups; Steering Committee, organizational stakeholders, and the general public. The information currently being solicited, collected and organized will be integrated into the plan.

Natural Hazard Mitigation Plan Renewal Project 2011

This month the steering committee met for a mid project meeting. Updates were shared from the project manager, contractor and members in attendance. The focus of the meeting was successes and challenges faced and strategies to address these challenges. Chapters in draft form are Chapters 1-Introduction, 6-earthquakes, 7-wildfire and appendix 1 and 2 related to grants available and benefit cost analysis. The schedule was updated and is reflected in orange above. We have also begun to explore possible venues for public meetings in the near future.
